Art Unit: 3728

1. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

2. The abstract of the disclosure is objected to because the italicized reference to Figure 2 at the bottom of the Abstract is improper and should be deleted. Correction is required. See MPEP § 608.01(b).

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which

Art Unit: 3728

applicant regards as the invention. In claim 1, lines 2-3 of the claim, "said cassette fixedly provided" is ungrammatical. In line 9, the word "means" is preceded by the word(s) "horizontal knuckle" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967). See also line 15. In line 11, "said vertical sliding" lacks antecedent basis as a noun. In line 15, "said thrust face disposed" is ungrammatical. In lines 15-16, "a front side" lacks antecedent basis for what a "front" would be, as the holder member is insufficiently defined to have a "front" or what such encompasses. See also "back side" in line 18.

In claim 3, line 3, "the front sides" lack antecedent basis for what such comprise, and "said U-shaped holder member" is inconsistent terminology with the antecedent recitation.

In claim 5, lines 2, 3 and 4, "stop means" is indefinite, as the word "means" is preceded by the word "stop" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function with respect to any antecedent structure is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See also claim 6, lines 2, 3 and 4.

In claim 9, line 3, "at same elevation" is ungrammatical.

In claim 11, such repeats a structural combination already defined in claim 1, and is, as written, apparently a duplicate claim of claim 1, as any difference in scope is not apparent.

5. Applicant is advised that should claim 1 be found allowable, claim 11 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

6. Claims 1-10 or 2-11 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are workpiece holders installed in clean containers, or structure analogous thereto.
